No it has not. Have never seen this issue before. I'd be happy to forward it to Gregory, but I would note that the issue you are raising is not one that our organization he works on.

Mr Sullivan,

I had Toby Shorts contact your organization today because my request to network with Greg Harrison was bounced back with a DNS as you can see below. When I attempted to forward this same email to info@empowertexans.com the email at first showed up in my inbox (as if I had sent it to myself) then much later showed up in my sent mail folder. today was the third attempt from 3 different IP addresses to be rejected. could this be happening to others trying to contact you?

May this request be forwarded to Mr. Harrison?
